FLOODING/STORM:
4,875 HHs affected

#Factsheet-SITUATION REPORT | Flooding –West Guji |

November 11,2023

Overview-Critical

West Guji communities in **GELANA**, **ABAYA** and **BULE HORA** districts have been affected by devastating floods, and other areas in the zone are at risk , as per the sources from the area. The rains have not ceased, and the impact of the floods is expected to grow in terms of its geographic spread as well as the intensity of misery it inflicts. Many the kebeles are flooded or serving as refugee for displaced families, ERCS staff members/Volunteers and neighbours have lost their homes, crop lands and livelihoods across the communities have been swept away by the advancing waters.

We are therefore creating this **FACT-SHEET** for **FLOOD RELIEF SUPPORT** to help address immediate needs and enable rehabilitation in the future. In this time of urgent need, **HH Non-Food Items**, **Food Items & Shelter** are the top priorities including **medical items** as the area is also affected by Cholera outbreak!
