

ERCS-EOC Flood IBF Notification

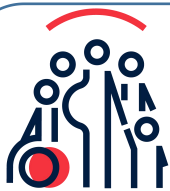

Forecasted for flood:
May 15 to May 21, 2024

Overview

The information is sourced from the ERCS EOC Impact-Based Forecasting (IBF) notification portal, to take early action to save lives and livelihoods ahead of a hazard. The flood will occur from May 15 to May 21, 2024, impacting two vulnerable zones. Approximately 8,001 people are forecasted to be affected by the flood. The affected areas are located in the southern region of the country, marked by a red outline on the map.

List of potentially exposed zones with predicted exposed populations

8,001

Total # of affected peoples

Zone (Region)	Predicted Exposed population
